

Section	Field Name	Type	Description
	record	integer	Record number
relative_risk	relative_risk	object	
relative_risk	vape	string	Perceived harm of vapes relative to cigarettes
relative_risk	smokeless	string	Perceived harm of SLT relative to cigarettes
relative_risk	menthol	string	Perceived harm of menthol relative to non-menthol cigarettes
quit_method	quit_method	object	
quit_method	nicotine_replacement	string	Past quit method: NRT
quit_method	counseling	string	Past quit method: Counseling from health care provider
quit_method	other_tobacco	string	Past quit method: Switched to another tobacco product
quit_method	telephone_or_web	string	Past quit method: Telephone quit line or web-based program
future_quit_method	future_quit_method	object	
future_quit_method	nicotine_replacement	string	Future quit method: NRT
future_quit_method	prescription_pill	string	Future quit method: Prescription pills
future_quit_method	group	string	Future quit method: Stop-smoking clinic, class, or support group
future_quit_method	counseling	string	Future quit method: Counseling from health care provider
future_quit_method	switch_smokeless	string	Future quit method: Switch to smokeless tobacco
future_quit_method	switch_vaping	string	Future quit method: Switch to vaping products
future_quit_method	switch_pouches	string	Future quit method: Switch to nicotine pouches
future_quit_method	telephone_or_web	string	Future quit method: Telephone quit line or web-based program
quit_barrier	quit_barrier	object	
quit_barrier	weight_gain	string	Quit barrier: Risk of gaining weight
quit_barrier	stress	string	Quit barrier: Way I handle stress or anxiety
quit_barrier	lives_with_smoker	string	Quit barrier: Lives with another smoker
quit_barrier	withdrawal	string	Quit barrier: Withdrawal from nicotine
quit_barrier	habits	string	Quit barrier: Smoking habits or routines
current_use	current_use	object	
current_use	cigarillos	string	Days used little cigars or cigarillos (past 30 days)
current_use	cigars	string	Days smoked large or premium cigars (past 30 days)
current_use	vape	string	Days used vaping products (past 30 days)
current_use	smokeless	string	Days used smokeless tobacco (past 30 days)
current_use	pouches	string	Days used nicotine pouches (past 30 days)
trust_for_quit_info	trust_for_quit_info	object	
trust_for_quit_info	partner	string	Trust for quit info: Spouse/partner
trust_for_quit_info	family_or_friends	string	Trust for quit info: Other family or friends
trust_for_quit_info	quitters	string	Trust for quit info: People who have successfully quit
trust_for_quit_info	doctor	string	Trust for quit info: Doctor or other provider
trust_for_quit_info	scientists	string	Trust for quit info: Scientists or researchers
trust_for_quit_info	cig_companies	string	Trust for quit info: Cigarette companies
trust_for_quit_info	vape_companies	string	Trust for quit info: Vape companies
trust_for_quit_info	gov	string	Trust for quit info: Government health agencies
trust_for_quit_info	state	string	Trust for quit info: State or local health orgs
trust_for_quit_info	religious_org	string	Trust for quit info: Religious organizations
community_involvement	community_involvement	object	
community_involvement	religious	string	Community involvement: Religious entity
community_involvement	civic	string	Community involvement: Local rotary or civic group
community_involvement	wellness	string	Community involvement: Gym or wellness group
community_involvement	volunteer	string	Community involvement: Volunteer group
community_involvement	hobby	string	Community involvement: Special interest or hobby group
community_involvement	school	string	Community involvement: School-based organization
community_involvement	municipality	string	Community involvement: Local municipality or govt
community_involvement	none	string	Community involvement: None of the above
tobacco_ad_exposure	tobacco_ad_exposure	object	
tobacco_ad_exposure	retail	string	Tobacco ad exposure: Gas stations or retail stores
tobacco_ad_exposure	billboards	string	Tobacco ad exposure: Billboards
tobacco_ad_exposure	newspapers_magazines	string	Tobacco ad exposure: Newspapers or magazines
tobacco_ad_exposure	radio	string	Tobacco ad exposure: Radio
tobacco_ad_exposure	television	string	Tobacco ad exposure: Television
tobacco_ad_exposure	events	string	Tobacco ad exposure: Events
tobacco_ad_exposure	nightlife	string	Tobacco ad exposure: Nightclubs, bars, or music concerts
tobacco_ad_exposure	websites	string	Tobacco ad exposure: Websites
tobacco_ad_exposure	social_media	string	Tobacco ad exposure: Social media
switching_intent_vaping	switching_intent_vaping	object	
switching_intent_vaping	gradual	string	Switching intent: Plan to gradually switch to vapes
switching_intent_vaping	full_replacement	string	Switching intent: Plan to use vapes as full cigarette replacement
switching_intent_vaping	next_six_months	string	Switching intent: Intend to switch to vapes in next 6 months
switching_intent_smokeless	switching_intent_smokeless	object	
switching_intent_smokeless	gradual	string	Switching intent: Plan to gradually switch to smokeless tobacco
switching_intent_smokeless	full_replacement	string	Switching intent: Plan to use smokeless tobacco as full cigarette replacement
switching_intent_smokeless	next_six_months	string	Switching intent: Intend to switch to smokeless tobacco in next 6 months
	relative_addiction_menthol	string	Perceived addictiveness of menthol to non-menthol
	nicotine_causes	string	Nicotine causes most smoking-related cancer
	quit_intentions	string	Intentions to quit smoking cigarette
	quit_ever	string	Ever stopped smoking for 1+ day to quit
	times_stopped	string	Times stopped smoking 1+ day (past 12 months)
	reason_vape	string	Primary reason for current vape use (among those who currently vape)
	reason_smokeless	string	Primary reason for current SLT use (among those who currently use SLT)
analytic_variables	analytic_variables	object	
analytic_variables	relative_risk	object	
analytic_variables	relative_risk	string	Perceived harm of vapes relative to cigarettes
analytic_variables	relative_risk	string	Perceived harm of SLT relative to cigarettes
analytic_variables	relative_risk	string	Perceived harm of menthol relative to non-menthol cigarettes
analytic_variables	quit_method	object	
analytic_variables	evidenced_based	string	Open to evidence-based quit strategy
analytic_variables	used_vape_or_smokeless	string	Open to switching to lower-harm product
analytic_variables	future_quit_method	object	
analytic_variables	fda_approved	string	Open to FDA-approved cessation method
analytic_variables	evidenced_based	string	Open to evidence-based quit strategy
analytic_variables	used_vape_or_smokeless	string	Open to switching to lower-harm product
analytic_variables	quit_barrier	object	
analytic_variables	weight_gain	string	Quit barrier: Risk of gaining weight
analytic_variables	stress	string	Quit barrier: Way I handle stress or anxiety
analytic_variables	lives_with_smoker	string	Quit barrier: Lives with another smoker
analytic_variables	withdrawal	string	Quit barrier: Withdrawal from nicotine
analytic_variables	habits	string	Quit barrier: Smoking habits or routines
analytic_variables	current_use	object	
analytic_variables	vape	string	Days used vaping products (past 30 days)
analytic_variables	smokeless	string	Days used smokeless tobacco (past 30 days)
analytic_variables	pouches	string	Days used nicotine pouches (past 30 days)
analytic_variables	trust_for_quit_info	object	
analytic_variables	partner	string	Trust for quit info: Spouse/partner
analytic_variables	family_or_friends	string	Trust for quit info: Other family or friends
analytic_variables	quitters	string	Trust for quit info: People who have successfully quit
analytic_variables	doctor	string	Trust for quit info: Doctor or other provider
analytic_variables	scientists	string	Trust for quit info: Scientists or researchers
analytic_variables	cig_companies	string	Trust for quit info: Cigarette companies
analytic_variables	vape_companies	string	Trust for quit info: Vape companies
analytic_variables	gov	string	Trust for quit info: Government health agencies
analytic_variables	state	string	Trust for quit info: State or local health orgs
analytic_variables	religious_org	string	Trust for quit info: Religious organizations
analytic_variables	community_involvement	object	
analytic_variables	religious	string	Community involvement: Religious entity
analytic_variables	civic	string	Community involvement: Local rotary or civic group
analytic_variables	wellness	string	Community involvement: Gym or wellness group
analytic_variables	volunteer	string	Community involvement: Volunteer group
analytic_variables	hobby	string	Community involvement: Special interest or hobby group
analytic_variables	school	string	Community involvement: School-based organization
analytic_variables	municipality	string	Community involvement: Local municipality or govt
analytic_variables	none	string	Community involvement: None of the above
analytic_variables	sex	string	Sex (2-level)
analytic_variables	age_group	string	Age group (4-level)
analytic_variables	race_or_ethnicity	integer	Race/ethnicity (4-level)
analytic_variables	sexual_orientation	string	Sexual Orientation (2-level)
analytic_variables	educational_achievement	string	Educational attainment (4-level)
analytic_variables	subjective_income_adequacy	string	Subjective income adequacy (reverse coded)
analytic_variables	relative_addiction_menthol	string	Menthol cigs perceived equally/less addictive
analytic_variables	nicotine_causes	string	Believes nicotine causes most smoking cancer
analytic_variables	couse_combustibles	string	Co-use: Combustible tobacco, cigars/LCCs
analytic_variables	couse_noncombust	string	Co-use: Non-combustible tobacco, e-cigs/SLT
analytic_variables	quit_attempts	string	1+ quit attempts in past 12 months
analytic_variables	tobacco_ad_exposure	integer	Tobacco advertising exposure index
analytic_variables	switch_vape	number	Intentions to switch to e-cigarettes scale
analytic_variables	switch_smokeless	number	Intentions to switch to smokeless tobacco scale
analytic_variables	predicted_class_membership	integer	Latent class: Predicted class membership
