

Section	Field Name	Type	Description
	sample_id	string	Unique sample IDs
	qc_control	string	Quality control, indicating whether the sample is an actual sample, an internal control, or a pooled sample
	sex	string	Sex (Female or Male)
	age	integer	Age in years, at the time of enrollment
	severity	string	Severity category (Mild, Moderate, Severe)
	positive_control	string	Positive control
	plant_gene_controls	array of objects	
plant_gene_controls	name	string	Name of the measured control
plant_gene_controls	raw_value	integer	Raw value of the measured control
plant_gene_controls	processed_value	double	Processed value of the measured control
	housekeeping_gene_controls	array of objects	
housekeeping_gene_controls	name	string	Name of the measured control
housekeeping_gene_controls	raw_value	integer	Raw value of the measured control
housekeeping_gene_controls	processed_value	double	Processed value of the measured control
	mirnas	array of objects	
mirnas	name	string	Name of the measured miRNA
mirnas	raw_value	integer	Raw value of the measured control
mirnas	processed_value	double	Processed value of the measured control
	proteins	array of objects	
proteins	protein_symbol	string	Symbol of the measured protein
proteins	uni_prot_id	string	UniprotID
proteins	olink_id	string	OlinkID
proteins	value	float	Value of the measured protein
