

Section	Field Name	Type	Description
	participant_id	string	Participant ID
	exlude	boolean	Indicator of whether the datapoint was excluded from analysis. 0 indicates inclusion and 1 indicates exclusion. Note: One subject (16204) had detectable levels of citalopram and metabolites at predose at levels suggesting repeated administration. This participant was excluded from all analyses as a protocol violation as per I/E criteria.
	age	integer	Flag for if the participant had an event meeting criteria for the primary endpoint
	sex	string	Sex of the participant (one of 'Female' or 'Male')
	ethnicity	string	Ethnicity of the participant (one of 'Hispanic or Latino' or 'Not Hispanic or Latino')
	race	string	Race of the participant. One or multiple of 'American Indian or Alaska Native', 'Asian', 'Black or African American', 'Native Hawaiian or Other Pacific Islander', 'White' or 'Unknown'.
	height	number	Height of the participant (unit = cm)
	weight	number	Weight of the participant (unit = kg)
	body_mass_index	number	Body mass index of the participant (unit = kg/m2)
	phenotype	string	Type of CYP2C19 metabolizer based on genotyping results. One of 'Normal', 'Intermediate', 'Rapid', or 'Ultra-Rapid'.
	rs7438135_genotype	string	Type of UGT2B7 rs7438135 variation. One of GG, AG, AA.
	rs7668282_genotype	string	Type of UGT2B7 rs7668282 variation. One of TT, TC, CC.
	rs7439366_genotype	string	Type of UGT2B7 rs7439366 variation. One of TT, CT, CC.
	study_visit_days	array of objects	
products	product	string	Administered product. One of 'Citalopram alone', 'Citalopram + steady state cannabidiol', 'Morphine alone', 'Morphine + 1 dose of cannabidiol', 'Morphine + steady state cannabidiol'.
products	times	array of objects	
times	times	integer	Nominal sampling time (unit = hours).
times	analytyes	array of objects	
analytes	analytye	string	Measured analyte. One of Citalopram, Desmethylocitalopram, Morphine, Morphine-3-glucuronide, Morphine-6-glucuronide.
analytes	concentration	number	Reported concentration with BLQ values set to zero (unit = ng/mL).
analytes	blq	boolean	Denotes samples below the limit of quantitation. Limits were 0.2 ng/mL for citalopram, 0.16 ng/mL for desmethylocitalopram, 0.78 ng/mL for morphine, 3.91 ng/mL for morphine-3-glucuronide, and 1.56 ng/mL for morphine-6-glucuronide.
